Re: STB Finance Docket 34284
Proposed Vulcan Materials Company/Southwest Gulf Rail Line
Quihi, Medina County, Texas

Dear Ms. Rutson:

At the present time, we understand that the STB is in the process preparing an Environmental Impact Study of the proposed SGR rail line, and determining the extent of the inclusion of the quarry in the EIS.

The people of this area that would be affected are very concerned about the permanent environmental changes that this fifty-plus year project would cause. This is a historic/agricultural/residential area that would be changed forever by the enormity and magnitude of this 1760 acre quarry and the 7.5 mile rail through the historic area of Quihi and its floodplain. The people of this area have already made known these concerns in detail in their scoping comments.

Enclosed is a petition, began April 24, 2004, which has been signed by 537 persons who would be affected by this project if it were allowed to proceed. The petition is as follows:

PETITION

I am opposed to the proposed Vulcan/Southwest Gulf Railroad project for a quarry and rail line in Quihi, Medina County, Texas because of the many harmful impacts this project will have on this area, including our air, water, roads and historical heritage.

In addition, unless the Surface Transportation Board makes the decision in accordance with certain legal requirements to study both, the quarry will not be included in the Environmental Impact Study..

I, the undersigned, therefore, request that the STB do a connected action study of both the quarry and the railroad in the EIS.

These signers include the majority of the persons residing in the Quihi area, as well as persons who would otherwise be affected. We targeted persons who would be affected by:

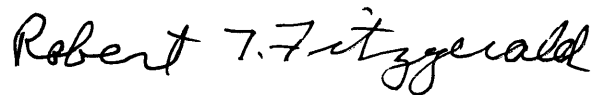

- Pollution from noise, dust, vibration, blasting
- Loss of water supply due to damage to water wells and septic systems
- Danger of traffic congestion from the trains and trucks
- Loss of historic structures by flooding and loss of the aesthetic value of these structures by the proximity of the rail line in the Quihi area
- Environmental changes in the water supply and air purity
- Dangers of flooding and increased flooding of property and roadways

These signatures show the continuing and ever-growing sentiment against this project, and that the commitment and resolve of the people has not changed. People are still sending in signatures, and it appears as though we will have another mailing of signatures to you shortly. When this is completed, we anticipate that between 90 and 95% of the people living in the area of this project will have signed.

Also enclosed is a map showing the residences in the Quihi area, and a map showing the sixty-plus historic sites thus far documented in the Quihi area which have been submitted to the Texas Historical Commission. Both show the floodplain areas, and the SGR proposed and alternate routes through the floodplain.

We present these signatures as evidence that the over-whelming majority of the persons in the area who know about this project are opposed to it. We submit it for your consideration and judgment in helping the STB reach a correct and just decision.

Sincerely,

A handwritten signature in black ink that reads "Robert T. Fitzgerald". The signature is written in a cursive, flowing style.

PETITION

I am opposed to the proposed Vulcan/Southwest Gulf Railroad project for a quarry and rail line in Quin, Medina County, Texas because of the many harmful impacts this project will have on this area, including our air, water, roads, historical heritage and the environment in general.

In addition, unless the Surface Transportation Board makes the decision in accordance with certain legal requirements to study both the quarry and the railroad as connected actions, the quarry will not be included in the Environmental Impact Study (EIS).

I, the undersigned, therefore, request that the STB do a connected action study of both the quarry and the railroad in the EIS.

I am opposed to the proposed Vulcan/Southwest Gulf Railroad project for a quarry and rail line in Quin, Medina County, Texas because of the many harmful impacts this project will have on this area, including our air, water, roads, historical heritage and the environment in general.

In addition, unless the Surface Transportation Board makes the decision in accordance with certain legal requirements to study both the quarry and the railroad as connected actions, the quarry will not be included in the Environmental Impact Study (EIS).

I, the undersigned, therefore, request that the STB do a connected action study of both the quarry and the railroad in the EIS.

Medina County Resident or Landowner

PETITION

I am opposed to the proposed Vulcan/Southwest Gulf Railroad project for a quarry and rail line in Quin, Medina County, Texas because of the many harmful impacts this project will have on this area.

In addition, unless the Surface Transportation Board makes the decision in accordance with certain legal requirements to study both, the quarry will not be included in the Environmental Impact Study..

I, the undersigned, therefore, request that the STB do a connected action study of both the quarry and the railroad in the EIS.

PETITION

I am opposed to the proposed Vulcan/Southwest Gulf Railroad project for a quarry and rail line in Quihí, Medina County, Texas because of the many harmful impacts this project will have on this area.

In addition, unless the Surface Transportation Board makes the decision in accordance with certain legal requirements to study both, the quarry will not be included in the Environmental Impact Study..

I, the undersigned, therefore, request that the STB do a connected action study of both the quarry and the railroad in the EIS.
